Site Review Notes:

• The colors are good, the background texture could be a little more yellow-ish if possible however. Also, the file is quite large so if you could export it as a smaller file that could probably solve the issue.

• The body copy could be helped by increasing the size slightly, giving it a little more leading as well.

• You might want to give the navigation bar at the top a fixed width so the items in the menu don't wrap.
